
EMPLOYEES PER 1,000 POPULATION

The number of employees reflect the number of budgeted regular full time and regular part time positions stated in full time equivalents for each year. Since personnel costs represent a significant portion of the County's operating budget, changes in the number of employees in relation to the population of the County provide another means of assessing the growth in County operations. Increases or decreases may indicate changes in the productivity of employees. A substantial reduction occurred in 1988 due to the termination of the County's nursing home. Since then, the net staff increases have been relative to population growth. Staff increases for the new 144 bed jail/justice addition are included in 1993. Additional positions in 1996 are for additional bed capacity at the Huber facility and positions for the new Nagawaukee Ice Arena. In 1997, additional positions are needed for opening of 4th pod in the jail facility. In 1998, positions are reduced with the transfer of the new State economic assistance program to a third party provider. The previous program was provided by County staff. The opening of a new park, and expansion in the courts and jail have increased the number of positions, however these increases are at a lower growth rate than the growth rate in population.
